

This is a case study about a resident, Mr. McNally, who came into a CLC for short-term rehab after a stroke. He declined rapidly and in ways that were avoidable.

INSTRUCTIONS:

1. Form groups of 4 – 6 people.
2. Deal all cards out.
3. Working together, organize the information on the cards into a sequence so you can answer two questions:
 - What was Mr. McNally like when he first came in?
 - What caused his decline?
